SONIA MALIK

Principal Engineer, AI Enablement & Adoption · Generative & Agentic AI · Responsible AI

Edison, NJ · 732-629-1034 · sonia.malik78@gmail.com · linkedin.com/in/sonia-malik-b059705

Prototype built for this role: https://soniamalik78-sys.github.io/prototypes/elevate-wf/

SUMMARY

24+ years in engineering and transformation leadership; started as a hands-on engineer and still builds. Takes AI from first experiment to everyday practice: working prototypes, reusable agents, prompts and playbooks, adoption coaching, and security, testing, governance and human oversight from day one. A hands-on builder who has led at scale, now seeking a senior individual contributor role.

- **AI adoption at scale:** 350+ engineers on governed AI in 13 months, on an AI developer platform stood up in 6 months and designed to serve ~1,200 engineers (S&P Global).
- **Workforce enablement:** engagement 85% → 95% in 3 quarters through a skills assessment and peer pairing; ran 4 hackathons (the first at S&P Global drew 100+ participants) and hands-on workshops; 50+ engineers reskilled into automation at Prudential.
- **Hands-on builder:** machine learning on production incidents from 2022 at Audible; now GenAI prototypes and reference implementations with Claude Code, including ELEVATE·WF (linked above); designed creator and judge agents with LLM-as-judge evaluation.
- **Responsible AI by default:** chaired the AI Governance Committee; reviewed 10+ AI tools; 0 autonomous production deploys; regulated sign-off 3 days → same day.

Core: AI Enablement & Adoption · Generative AI & Agentic AI · Prototypes, Proofs of Concept & Reference Implementations · Reusable Agents, Prompts & Playbooks · AI Learning & Development Strategy · Change Management & Workforce Enablement · Hackathons, Workshops, Demos & Facilitation · Technical Training · Use-Case Discovery · Model Evaluation & Observability · Security, Data Protection, Governance & Human Oversight · Emerging AI Tool Evaluation · Low-Code Automation (UiPath, Power Automate) · Standards & Best Practices · Stakeholder Communication · Mentoring & Coaching

SELECTED ACCOMPLISHMENTS: AI FROM PROTOTYPE TO DAILY PRACTICE

- **Adoption, not just access: 350+ engineers on governed AI in 13 months.** Made the safe path the easy one: approved models in VS Code (Claude among them), privacy, security and regulatory checks as required pipeline steps, a 32+ engineer platform team, and 8–10 tools consolidated into shared platforms.
- **Prototype to reusable agents: features per PI +30% over 3 PIs; production defects −20% in 6 months; NPS +5.** Found that 80% of requirements were 1–2 lines and 60% of production bugs (across 1,450 incidents) were user-experience issues; introduced customer journeys and creator and judge agents that draft MVPs, features and BDD stories against configurable rubrics, with human validation.
- **Use case with business users: analysts' time to a recommended rating −30%** vs benchmark in UAT. Shaped Ratings AI decision support with analysts as the business users: it detects market events, alerts the analyst and recommends a rating with its rationale; the analyst decides. An A/B-tested dashboard built their trust.
- **Reusable assets and standards: 100+ scrum teams adopted one security testing framework**, shipped as a shared repository and templates with a CI/CD quality score that blocks promotion; S&P Dow Jones Indices picked it up next. Added log scrubbing so sensitive details never reach AI models.
- **People through the change: engagement 85% → 95% in 3 quarters; 17 promotions incl. 2 to Director**.

PROFESSIONAL EXPERIENCE

S&P Global, New York, NY **August 2025 – September 2026**

Vice President, Head of Quality Engineering · Chair, AI Governance Committee

Mandate expanded to include AI PDLC (AI developer platform, agents, governance). Senior Directors as direct reports; $70M+ budget; two business units.

- **AI developer platform: 350+ engineers on governed AI in 13 months** on a platform stood up in 6 months and designed to serve ~1,200 engineers; **regression 9 days → daily; releases 2× in 3 months**.
- **Enablement: engagement 85% → 95% in 3 quarters** through a skills assessment and peer pairing for engineers adopting governed AI; ran 2 hackathons (automation; customer centricity), the first with 100+ participants; QE leaders embedded in delivery scrum teams plus a central framework team.
- **Governance: 0 autonomous production deploys; regulated sign-off 3 days → same day**, with human approval enforced in the pipeline; chaired the AI Governance Committee (CISO, Risk, Compliance, Legal) and reviewed 10+ AI tools under cybersecurity and controls.

DoubleVerify (DV), New York, NY **July 2024 – August 2025**

VP of Product and Engineering – Head of Quality Engineering

VPs and Directors as direct reports; 200+ contractors across five countries.

- **AI-assisted engineering: manual effort −25%; test cycles −20%**; SOX findings closed with auditors.

Audible Inc., an Amazon company, Newark, NJ **August 2019 – April 2024**

QAE Director (CTO Office) – Consumer Domain QA Head

10 SDEs direct, 270+ indirect; scaled from 4 to 41 engineers plus 2 offshore centers.

- **Adoption across teams: manual effort −60% across 17 teams**; regression 5 days → 2. Lead champion for the CTO innovation team; ran 2 hackathons (automation and bug bashing; security vulnerabilities) with about 25 participants; security champion training at Audible.
- **Outcomes: Sev2s, security vulnerabilities and launch risk each −30%**; **$50M+** revenue from the non-functional CoE; **$10M+** from geo-customization; machine learning on production incidents from 2022 to find repeat-causing patterns.

Prudential Insurance Company of America, Newark, NJ **December 2015 – August 2019**

Head of Quality Engineering (CIO Office) – Customer Office & Retirement

- **Reskilling at scale:** took in **150+ mainframe engineers; reskilled 50+ into automation** through a structured 6-month Selenium curriculum with prizes and awards; moved 35+ roles with backup coverage; hands-on workshops moved business units to a new Customer Office operating model.
- **Customer centricity: multi-product customers 3% → 5%, $100M revenue impact** (unified customer dashboard).
- **Delivery: testing time −30% in 9 months; QA cost −50%**; UAT a week → 2–3 days across 5 business units.

EARLIER EXPERIENCE

Pearson (QA Manager, 2012–2015) · SanPulse (2011) · TheMarkets.com (2006–2009) · Guardian Life (2005–2006) · Sasken (2003–2005) · HCL (Automated Tooling Support Engineer, 2002–2003) · Siemens (2001–2002)

EDUCATION & CERTIFICATIONS

Master of Science (Computer Applications) · Bachelor's in Computer Science, Kurukshetra University · Rutgers Mini MBA (Customer Centricity), certificate · SAFe Scrum Master · CSM · CSPO

AI & TECHNICAL SKILLS

GenAI and agentic AI: creator and judge agents, LLM-as-judge evaluation, human-in-the-loop; familiar with RAG and MCP · AI coding tools: Claude Code, GitHub Copilot, Devin, CodeRabbit · Automation: UiPath, Power Automate, Selenium · Python, Java, SQL · CI/CD, Azure DevOps, SAST/DAST · AWS, Azure · Responsible AI: NIST AI RMF, ISO/IEC 42001, EU AI Act
