EXECUTIVE SUMMARY

Technology executive with 24+ years in engineering and transformation leadership who partners with business leaders to turn high-value AI opportunities into production deployments with measurable business outcomes, then scales what works into reusable patterns and accelerators.

- **Scale:** led a 350+ global organization on a $70M+ budget across two business units at S&P Global.
- **AI in production:** stood up an enterprise AI developer platform designed to serve 1,200 engineers in 6 months; ~400 engineers on governed AI within 13 months.
- **Builder of teams:** hired seven times to build or revitalize high-performing engineering organizations; partners with Product, Platform Engineering and Architecture.
- **Customer-centric:** Rutgers Mini MBA in Customer Centricity; customer journeys at the center of every delivery model.

Core: Forward Deployed Engineering · Applied AI & Customer Engineering · Enterprise AI Adoption · Agentic AI Platforms & Agentic Systems · Generative AI · Operating Model & Execution Framework · Use Cases → Production Deployment · Reusable Patterns & Accelerators · Platform Engineering, Product & Architecture Partnership · Executive Alignment · Delivery Excellence · High-Performing Engineering Organizations

SELECTED ACCOMPLISHMENTS: FORWARD DEPLOYED ENGINEERING

- **Business outcomes with AI: −30% analysts' time to a recommended rating** vs benchmark in UAT. Ratings decision support detects market events, alerts the analyst and recommends a rating with its rationale; the analyst decides. An A/B-tested dashboard built analysts' trust in AI recommendations (S&P Global).
- **Customer journeys over one-liners: features per PI +30% over 3 PIs; production defects −20% in 6 months; NPS +5.** Replaced one-line requirements (80% of all) with customer journeys, after finding 60% of production bugs across 1,450 incidents were user-experience issues; creator and judge agents drafted MVPs, features and BDD stories with human validation.
- **Scale what works: 100+ scrum teams adopted one security testing framework**, and S&P Dow Jones Indices picked it up next. Four stages (SAST, runtime DAST with negative tests, release-driven penetration testing, internal ethical hacking), plus log scrubbing before data reaches a model and a CI/CD quality score that blocks promotion, shipped as a shared repository and templates.
- **Delivery excellence: regulated sign-off 3 days → same day; releases 2× in 3 months; regression lead time 9 → 4 days**, with 0 autonomous production deploys.

PROFESSIONAL EXPERIENCE

S&P Global, New York, NY **August 2025 – September 2026**

Vice President, Global Head of Quality Engineering & AI PDLC

Led the platform and delivery teams (Senior Directors as direct reports); $70M+ budget; mandate expanded to AI-first PDLC across two business units.

- **Embedded model: 8–10 tools consolidated** into shared in-house platforms; QE leaders embedded in delivery scrum teams plus a central framework team; product-leader responsibility for 10 scrum teams.
- **Executive alignment: engagement 85% → 95%; Dev:QE 2.5:1 → 4:1; 17 promotions incl. 2 to Director.** Presented the multi-year transformation strategy to executive leadership; chaired the AI Governance Committee (CISO, Risk, Compliance, Legal); reviewed 10+ AI tools under cybersecurity and controls.

DoubleVerify (DV), New York, NY **July 2024 – August 2025**

VP of Product and Engineering – Head of Quality Engineering

VP and Director reports; $25M–$30M budget; 100+ contractors across the UK, Israel, France and Ireland.

- **Outcomes: manual effort −25%; test cycles −20%.**
- **Agentic workflows:** guardrails and human review gates; AI-assisted testing and predictive defect analysis.

Audible Inc., an Amazon company, Newark, NJ **August 2019 – April 2024**

QAE Director (CTO Office) – Consumer Domain QA Head

$25M–$30M budget; 8 directs (incl. 2 directors), ~40 FTEs, 70+ indirect; scaled 4 → 41 plus 2 offshore centers.

- **Customer outcomes: Sev2s, security vulnerabilities and launch risk each −30%**; regression 5 → 2 days; manual effort −60% across 17 teams.
- **Revenue: $50M+** from the non-functional CoE; **$10M+** from geo-customization.
- **Early AI:** machine learning on production incidents from 2022 to find repeat-causing patterns.

Prudential Insurance Company of America, Newark, NJ **December 2015 – August 2019**

Head of Quality Engineering (CIO Office) – Customer Office & Retirement

- **Customer centricity: multi-product customers 3% → 5%, $100M revenue impact**, as quality lead for the unified customer dashboard.
- **Customer Office: testing time −30% in 9 months** with test data virtualization; QE scaled to 40+ FTEs for 10 scrum teams at Dev:QE 3:1.
- **Regulated revamp: QA cost −50%; testing cycles −50%** with UAT across 5 business units; Retirement 150+ team on an $8M–$10M budget.

EARLIER EXPERIENCE

Pearson (QA Manager, 2012–2015) · SANpulse (2011) · TheMarkets.com (2006–2009) · Guardian Life (2005–2006, first US role) · Sasken · HCL · Siemens (career start, 2001–2002)

EDUCATION & CERTIFICATIONS

Master of Science (Computer Applications) · Bachelor's in Computer Science, Kurukshetra University · Rutgers Mini MBA (Customer Centricity), certificate · SAFe Scrum Master · CSM · CSPO

AI & TECHNICAL PROFICIENCIES

Generative AI and agentic systems (creator/judge agents, human-in-the-loop, evaluation gates; familiar with MCP, RAG) · Multi-model AI developer platform in VS Code · Claude Code, Devin, Copilot, CodeRabbit · Modern software engineering: CI/CD gates, SAST/DAST, Azure DevOps · Cloud platforms: AWS, Azure · Python, Java, SQL · NIST AI RMF, ISO/IEC 42001, EU AI Act
