EXECUTIVE SUMMARY

Technology executive with 24+ years in engineering and transformation leadership across consumer audio and subscriptions (Audible, an Amazon company), digital advertising (DoubleVerify) and regulated financial services (S&P Global, Prudential). Sets enterprise AI standards, turns governance into practical operating practice, and ties every Data & AI investment to a customer or business result, with domain teams keeping ownership of their outcomes.

- **Enterprise AI standards and adoption:** 350+ engineers on governed AI in 13 months on an AI developer platform stood up in 6 months and designed to serve ~1,200 engineers; chaired the AI Governance Committee (S&P Global).
- **Customer and business value:** multi-product customers 3% → 5%, $100M revenue impact (Prudential); features per PI +30% and NPS +5 with customer journeys and AI agents (S&P Global).
- **Consumer audio:** $50M+ revenue from the non-functional CoE, 550K new users and search ranking 5th → 3rd (Audible).
- **Leader of leaders:** Senior Directors as direct reports; $70M+ budget; 17 promotions incl. 2 to Director; engagement 85% → 95%.

Core: Enterprise Data & AI Strategy · Enterprise AI Standards & Responsible AI · Federated Operating Models · Data Governance, Data Quality, Lineage & Privacy · Experimentation & A/B Testing · Customer Analytics & Personalization · Agent & LLM Platforms · Applied ML · Model Evaluation & Human Oversight · AI Adoption & Workforce Enablement · Data & AI Scorecards & Value Realization · Platform Consolidation · Executive & Finance Partnership · Talent Development

SELECTED ACCOMPLISHMENTS: DATA & AI TO MEASURED OUTCOMES

- **Responsible AI at enterprise scale: regulated sign-off 3 days → same day; 0 autonomous production deploys.** Chaired the AI Governance Committee (CISO, Risk, Compliance, Legal); reviewed 10+ AI tools under cybersecurity and controls; made privacy, security and regulatory checks required pipeline steps, with human approval and auditability built in.
- **AI adoption with a shared foundation: 350+ engineers on governed AI in 13 months** on one AI developer platform (approved models in VS Code, Claude among them), built by a 32+ engineer platform team; **8–10 legacy tools consolidated** into shared platforms; engagement 85% → 95% in 3 quarters through a skills assessment and peer pairing.
- **Customer journeys to measured value: features per PI +30% over 3 PIs; production defects −20% in 6 months; NPS +5.** Found that 60% of production bugs (across 1,450 incidents) were user-experience issues and 80% of requirements were 1–2 lines; built a full AI PDLC ecosystem where customer journeys fed creator and judge agents, with human validation.
- **Experimentation and decision support: analysts' time to a recommended rating −30%** vs benchmark in UAT. Ratings AI detects market events, alerts the analyst and recommends a rating with its rationale; the analyst decides. An A/B-tested dashboard built trust before scale.
- **Data trust across the full data flow: end-to-end data quality testing for S&P Ratings, from data ingestion to the published rating**, with the PDLC framework mapping what data flows where; **100+ scrum teams adopted one security testing framework**; log scrubbing so sensitive data never reaches AI models.
- **Value realization with Finance: owned the QE budget and delivered the ROI scorecard to the CFO** at S&P Global and DoubleVerify; worked directly with PwC on tax audits, credits and capitalization of QE work (S&P Global).

PROFESSIONAL EXPERIENCE

S&P Global, New York, NY **August 2025 – September 2026**

Vice President, Head of Quality Engineering · Chair, AI Governance Committee

Senior Directors as direct reports; $70M+ budget; two business units. Mandate expanded to include AI PDLC.

- **Federated model: 350+ engineers on governed AI in 13 months**; QE leaders embedded in delivery scrum teams plus a central 32+ engineer platform team; product-leader responsibility for 10 scrum teams; regression 9 days → daily; releases 2× in 3 months.
- **Governance: regulated sign-off 3 days → same day**; chaired the AI Governance Committee; reviewed 10+ AI tools; ran 2 hackathons (automation; customer centricity), the first with 100+ participants.
- **Data and analytics:** built an analytics dashboard with a phased customer migration, A/B testing and cross-sell offers; daily data testing across the Ratings data flow; **17 promotions incl. 2 to Director**.

DoubleVerify (DV), New York, NY **July 2024 – August 2025**

VP of Product and Engineering – Head of Quality Engineering

Digital advertising verification and measurement. VPs and Directors as direct reports; $35M budget; 200+ contractors across five countries.

- **Outcomes: manual effort −25%; test cycles −20%**; SOX findings closed with auditors.

Audible Inc., an Amazon company, Newark, NJ **August 2019 – April 2024**

QAE Director (CTO Office) – Consumer Domain QA Head

Consumer audio and subscriptions. 10 SDEs direct, 270+ indirect; $35–40M budget; scaled from 4 to 41 engineers plus 2 offshore centers.

- **Listener growth and revenue: $50M+ revenue** from the non-functional CoE (performance, security, accessibility; higher SEO scores); **550K new users; search ranking 5th → 3rd; $10M+** from geo-customization.
- **Machine learning: Sev2s, security vulnerabilities and launch risk each −30%**; applied machine learning to production incidents from 2022 to find repeat-causing patterns; manual effort −60% across 17 teams.

Prudential Insurance Company of America, Newark, NJ **December 2015 – August 2019**

Head of Quality Engineering (CIO Office) – Customer Office & Retirement

- **Customer centricity: multi-product customers 3% → 5%, $100M revenue impact**, as quality lead for the unified customer dashboard.
- **Data and workforce: testing time −30% in 9 months** with full test data virtualization (data ready before engineers need it); **reskilled 50+ of 150+ mainframe engineers**; QA cost −50%; UAT a week → 2–3 days across 5 business units.

EARLIER EXPERIENCE

Pearson (QA Manager, 2012–2015) · SanPulse (2011) · TheMarkets.com (2006–2009) · Guardian Life (2005–2006) · Sasken (2003–2005) · HCL (Automated Tooling Support Engineer, 2002–2003) · Siemens (2001–2002)

EDUCATION & CERTIFICATIONS

Master of Science (Computer Applications) · Bachelor's in Computer Science, Kurukshetra University · Rutgers Mini MBA (Customer Centricity), certificate · SAFe Scrum Master · CSM · CSPO

DATA, AI & TECHNICAL SKILLS

Generative AI and agentic AI: creator and judge agents, LLM-as-judge evaluation, human-in-the-loop; familiar with RAG and MCP · Experimentation: A/B testing, customer journeys, KPI baselines · Machine learning on operational data · AI tools: Claude Code, GitHub Copilot, Devin, CodeRabbit · CI/CD, Azure DevOps, SAST/DAST · AWS, Azure · Responsible AI: NIST AI RMF, ISO/IEC 42001, EU AI Act
